In order to counter reported complacence on the part of certain senior Chinese that the MFN decision will be favorable to them, note the following:

- o That the Secretary will approach his decision rigorously, from a lawyer's point of view; that his independence, approach, and personal integrity were illustrated clearly in his leadership of the Christopher Commission following the riots in Los Angeles; and that the Secretary simply would not make a recommendation that he does not believe consistent with "overall, significant progress."

o

Similar and reinforcing talking points will be used as appropriate in other meetings with Chinese officials, such as in meetings with the Ministry of Justice, Ministry of Public Security, Ministry of Health, and Religious Affairs Bureau. Rule of law issues will also be discussed with the Procuratorate and with scholars and academics.
